Pekanbaru, Riau

I'm a highly enthusiastic Informatics Engineering student with a strong interest in design and data analysis. With experience in front-end development and UI/UX Design, I'm skilled in building websites using HTML, CSS, JS, and UI/UX using Figma. In addition, I have an interest in and experience in content writing, such as creating articles, copywriting, and other creative content. In the data field, I began to develop data analysis skills using tools such as Excel, SQL, and basic data visualization. I'm eager to learn, collaborate in teams, and further develop my skills in these areas.
